Hand disinfection

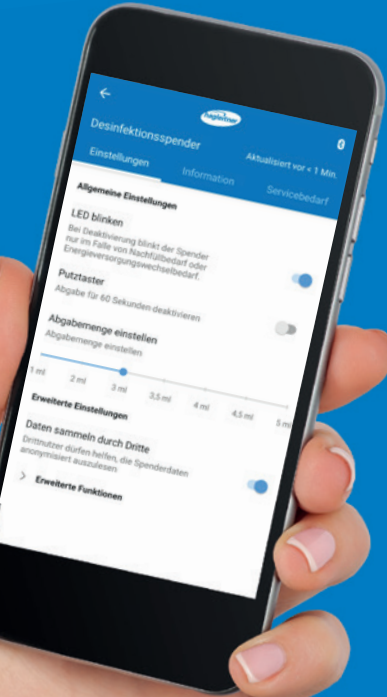

Haglaitner dispenses safety!

en

XIBU app

Digital management for your washrooms

One look at the smartphone is enough to view your valuable dispenser data: information about fill levels, energy supply and service requirements.

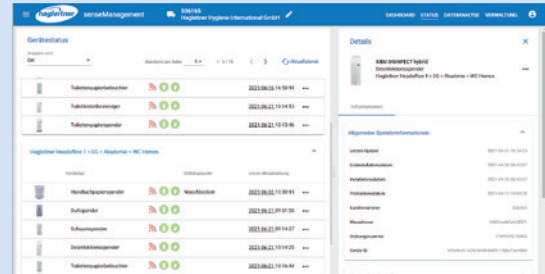

- 25% less service effort
- 30% more user satisfaction
- 100% more safety for everyone

Hagleitner hygiene portal

All your dispensers at a glance – our hygiene portal makes it possible!

Which of your dispensers require which action? The hygiene portal displays your information – online and always up to date!

Data transfer – Gateway

Would you like to have 24/7 real-time data for a full overview of your dispensers? This is easy to implement, even retrospectively, by means of an HsM gateway.

Your power – your decision

The XIBU hybrid dispenser can draw power in three ways:

By rechargeable battery: rechargePOWER

The rechargePOWER hybrid is a rechargeable battery. If it runs out, the powerSTATION offers enough room to recharge two batteries. The powerSTATION extension allows up to eight batteries to be charged at the same time.

By power supply unit: powerPACK ADAPTER hybrid

This power supply unit connects your XIBU dispenser directly to the mains. In combination with powerPACK ex or powerPACK in, it is suitable for both wall and flush mounting.

By energyBOX S/M/L

With the exceptionally durable energyBOX, you are opting for a sustainable and innovative energy solution. Hagleitner will collect your empty energyBOX and reprocess it in an environmentally friendly manner.

Hand sanitiser dispensers

the XIBU

All Hagleitner products are optimally matched to Hagleitner dispenser systems, offering the perfect combination to dispense hand sanitiser safely and reliably. The fact that Hagleitner produces everything itself, from development to the complete dispenser, makes the dispenser systems unbeatable. We offer state-of-the-art dispenser construction that is designed, developed and produced on site with the utmost precision. Made in Austria.
