

Innovative Hygiene.

XIBU XL FLUID

*the intelligent dispenser system
for your industrial washroom*

en

Simple. Smart. Always.

NEVER EMPTY AND ALWAYS AVAILABLE

Thanks to innovative reserve systems and real-time monitoring of the dispensers, dispensing is ensured at all times.*

* only with XIBU XL hybrid

EASY TO USE

A well thought-out operating concept enables simple and error-free dispenser operation - during both refilling and use.

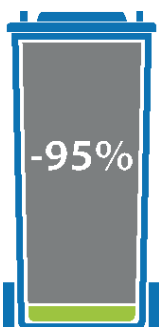

PROACTIVE MAINTENANCE

Proactive maintenance can be implemented by using the dispenser data. This means that your dispensers always remain available and ready to use.

AUSTRIAN QUALITY PRODUCT

Dispenser systems and refills from Hagleitner are developed, designed and manufactured in Zell am See, Austria.

The patented vacuumBAG generates up to 95 % less waste than products from other manufacturers. This is simply due to the fact that our refills are used up down to the last drops, whereas other systems contain residual quantities of 13 % and more. The outer

packaging of the vacuumBAG is a few micrometres thin and weighs just 21 grammes. This means that a standard waste container will hold over one million vacuumBAGs.

INDUSTRIAL DISPENSER FOR SKIN PROTECTION AND HAND HYGIENE

for personal protective equipment (PPE)

- Digital refill status
- Dispensing can be set using the XIBU app
- Digital consumption display
- Top technology standard

analog 

Cremes and soap for skin protection and hand hygiene are dispensed mechanically.

- Mechanical dispensing
- Manual quantity setting

Your energy - your flexibility

Hagleitner offers three simple and safe energy concepts that enable you to operate your XIBU hybrid dispensers economically and sparingly. The choice is yours.

rechargePOWER

The rechargePOWER offers you independence in supplying your XIBU hybrid dispensers. When empty, up to two rechargePOWER units can be easily recharged in the powerSTATION. The powerSTATION extension enables you to extend this up to eight units.

powerPACK ADAPTER hybrid

The powerPACK ADAPTER hybrid enables you to constantly supply your XIBU hybrid dispensers with energy. Whether installed in the wall or with a cable to the power outlet, this energy solution offers you long-term security. For high-frequency and simultaneous use of multiple dispensers, we recommend the powerPACK BOX.

energyBOX M

Choosing the energyBOX means deciding on a sustainable and innovative energy solution. Hagleitner will collect your empty energyBOX and reprocess it in an environmentally friendly manner.

Your washroom - your design

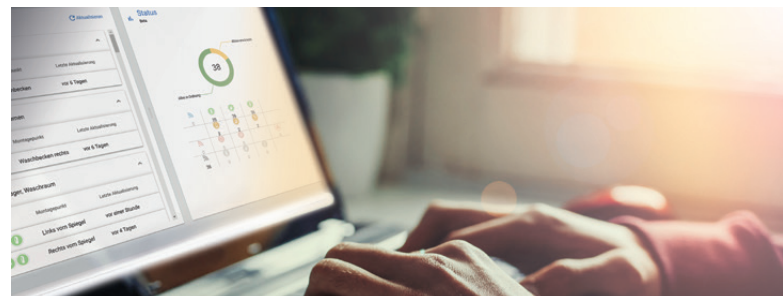

Black or white.

Your data - your information

XIBU app

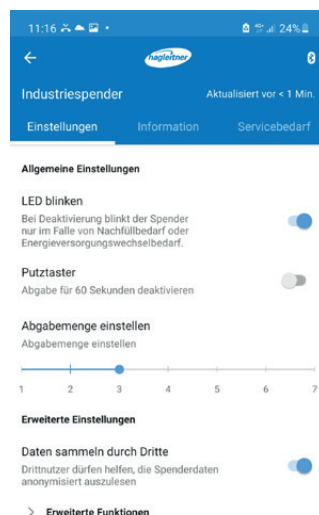

senseMANAGEMENT

Control of your washrooms

A glance at your smartphone suffices – and your valuable dispenser data are at hand: information about fill levels, energy supply and service requirements.

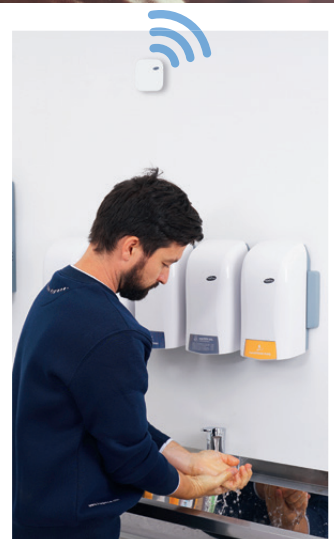

- 25% less service effort
- 30% more user satisfaction

All data - always live and up-to-date.

Thanks to automatic data collection, your data can be called up constantly and in real time, whenever and wherever you choose. Evaluations directly from the system enable you to plan your resources efficiently. This information and much more besides is available at www.hygieneportal.com.

- Optimisation of your process chain
- Guaranteed quality in the washroom

SKIN PROTECTION

- before starting work
- before and after wet work
- work before using protective gloves
- before contact with dirt, greases, oils
- before activities that are harmful to skin

handPROTECT PURE

6 x 750 ml

Art.-No. 4110710005

- dries quickly and residue-free, maintaining the skin's natural balance
- free of silicone, parabens, soap, colours and perfume
- replenishing and soothing to the skin, and allergy-friendly
- dermatologically tested

OUR SERVICE - YOUR PERSONAL SKIN CARE PLAN

With your help, your hygiene advisor can develop a skin protection plan for your business. The plan defines which products are used and how to use them. The refills used in XIBU XL FLUID follow the rules for personal protective equipment (PPE).

The use of skin protection and hand hygiene prevents occupational skin diseases and thus helps to save costs.

24/7 live data

The Hagleitner senseMANAGEMENT washroom system uses the intelligence of the XIBU dispensers for a completely new approach to facility management. Real-time information on the usage of each dispenser enables individualized cleaning schedules, just-in-time ordering and easier maintenance.

Full Service

The full-service package includes:

- Consulting, inspection & requirements assessment, delivery & assembly, training courses, wear parts & dispenser lid service as well as an annual technology check
- The XIBU hybrid dispensers also include the Proactive Program

This means that Hagleitner knows when a dispenser needs to be serviced and proactively carries out the cleaning, maintenance & repair of your dispensers. Your benefits:

- dispensers that always work
- 30% greater customer satisfaction & 25% lower personnel cost
- Innovative new service

Refills

Here, too, Hagleitner offers you a variety of solutions. Multiple awards and certificates attest to the high quality of the products, including the EU Ecolabel, the Austrian Ecolabel and dermatological expert assessments. The disinfectants from Hagleitner have been fully assessed and comply fully with the European biocide regulation.

Smart settings via the XIBU app

Dispenser settings can be individually adjusted in the XIBU app, depending on where and how you are using your dispensers.

Energy concept

Whether battery, power pack or energyBOX – you have the choice of how you want to operate your dispensers.

PPE

Our skin has a natural protective barrier that makes it difficult for fungi, germs and pathogens to penetrate the body. Contact with liquids or the continuous wearing of airtight and water-impermeable gloves softens the skin, weakening the natural protective layer considerably. This increases the risk of skin diseases and/or eczema. The use of skin protection and hand hygiene prevents occupational skin diseases and thus helps to save costs. In addition, the German Occupational Health and Safety Act obliges employers to ensure adequate protective measures at the workplace. With your help, Hagleitner will advise and draw up an individual skin protection plan for your company. The refills used in XL FLUID follow the rules for personal protective equipment (PPE).

Welcome to the world of the digital washroom!
