for your washroom*

en

NEVER EMPTY AND ALWAYS AVAILABLE

Thanks to innovative reserve systems and real-time monitoring of the dispensers, dispensing is ensured at all times.

EASY TO USE

A well thought-out operating concept enables simple and error-free dispenser operation - during both refilling and use.

PROACTIVE MAINTENANCE

Proactive maintenance can be implemented by using the dispenser data. This means that your dispensers always remain available and ready to use.

AUSTRIAN QUALITY PRODUCT

Dispenser systems and refills from Hagleitner are developed, designed and manufactured in Zell am See, Austria.

- Visual refill status
- Current-free operation
- Basic colours: white or black

Your energy - your flexibility

Hagelitrner offers three simple and safe energy concepts that enable you to operate your XIBU hybrid dispensers economically and sparingly. The choice is yours.

rechargePOWER

The rechargePOWER offers you independence in supplying your XIBU hybrid dispensers. When empty, up to two rechargePOWER units can be easily recharged in the powerSTATION. The powerSTATION extension enables you to extend this up to eight units.

powerPACK ADAPTER hybrid

The powerPACK ADAPTER hybrid enables you to constantly supply your XIBU hybrid dispensers with energy. Whether installed in the wall or with a cable to the power outlet, this energy solution offers you long-term security.

energyBOX S/M/L

Choosing the energyBOX means deciding on a sustainable and innovative energy solution. Hagelitrner will collect your empty energyBOX and reprocess it in an environmentally friendly manner.

Your washroom - your design

Your individual washroom in up to 1,000 designs

Change your XIBU design – whenever you want. However your washroom evolves, your design adapts and changes along with your chosen styling. You can choose from over 800 designs and 200 RAL colours in the online configurator: www.xibudesigner.com

Your data - your information

XIBU app

Control of your washrooms

A glance at your smartphone suffices – and your valuable dispenser data are at hand: information about fill levels, energy supply and service requirements.

- 25% less service effort
- 30% more user satisfaction

senseMANAGEMENT

All data - always live and up-to-date.

Thanks to automatic data collection, your data can be called up constantly and in real time, whenever and wherever you choose. Evaluations directly from the system enable you to plan your resources efficiently. This information and much more besides is available at www.hygieneportal.com.

- Optimisation of your process chain
- Guaranteed quality in the washroom
