# HAGLEITNER senseMANAGEMENT

Monitoring systems for well-functioning hand hygiene

**You can only manage and improve what you can measure!**

### Surveillance of the dispensed product quantity

Are really 3ml of hand disinfectant being used to attain an exposure time of 30 seconds? HsM helps you to optimize the quality of hand disinfection.

### Cost transparency

HsM can provide you the exact quantity consumed in detail for each individual dispenser. Also for soap, paper towels and toilet paper.

### Individual evaluation options

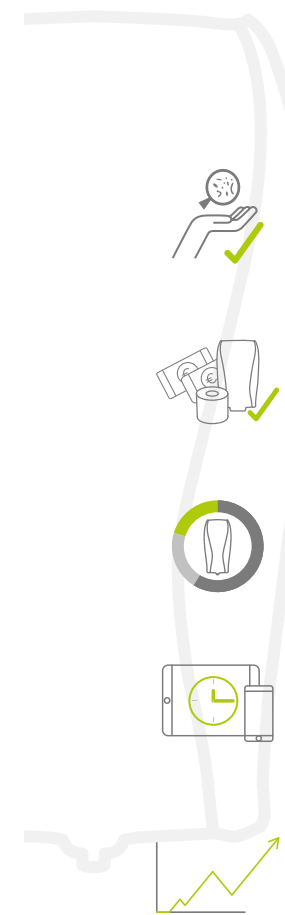

At the touch of a button you receive the number of doses per dispenser model respectively per defined area, easy and quick!

### Real-time information without direct control - 24/7

Save time & effort to support your colleagues: Consider the usage behaviour online without the regular workflow being disturbed.

### Increase of compliance in the first year by at least 20 percentage points

From HAGLEITNER HYGIENE you obtain objective and complete support for your hygiene team and increase your compliance above average.
