

safetyMOP	
Product description The safetyMOP is made of 100% high grade microfibres with a very good absorbency. This product is free of cotton and rayon and therefore hygienic and optimally suited for disinfection and cleaning. Wash the dust mops before using the first time.	
Field of application/use The safetyMOP is universally usable on all smooth floors. A colour code system is stitched on the back so that the covers can easily be classified into the individual application areas. Washable at 60 °C with our detergents of the havon MANUAL and havon PROFESSIONAL system. Best useable in the i.h.s. system. Desinfected to 60° C.
